

NGUYEN Khanh An

Software Engineer

☎ 079 823 3666 ✉ annguyen81401@gmail.com

ABOUT ME

I am a committed, flexible individual with a great capacity for effective research and information acquisition. I'm confident in my abilities to make a major contribution to the creation of a cutting-edge embedded system since I've demonstrated the ability to pick things up fast and work well in teams. My ability to solve problems and my enthusiasm for lifelong learning allow me to take on challenging tasks and lead projects to successful completion.

EDUCATION

University of Information Technology

Computer Network and Data Communication
GPA: 7.42

CERTIFICATE

CCNA, 200-301 | 08-12-2021

Score: 59 (Good)

TOEIC:

Listening-Reading: 650

Speaking-Writing: 240

PUBLICATION

GPS Signal Reception and
Spoofing Based on Software-
Defined Radio Devices

Published at IEEE Xplore, 18 January 2023

Authors: Tang Nguyen-Tan, Long Thai Hoang, An Khanh Nguyen, Tien Do Minh, Binh Bui-Thanh, Phuoc Nguyen T. H

Blockchain-based Reconfiguration
Management For Smart City
Architecture

Published at IEEE Xplore, 06 August 2024

Authors: An Nguyen-Khanh, Tri Le-Dinh, Bao Nguyen-Van, Thuat Nguyen-Khanh, and Quan Le-Trung

WORK EXPERIENCE

VNU.DC | MAY 2021- MAY 2022

IoT Intern

- Developed a management system for monitoring a t-shirt printing conveyor belt.
- Visualized on ThingsBoard.
- Enhanced real-time operational oversight and efficiency.

VNG CORP. | NOV 2023 - MAY 2024

Network Intern

Technical Skills: Libre, Grafana, Termius,

- Configured and monitored VNG Corporation's network system using Grafana and Libre.
- Managed network infrastructure including Core systems, Firewall, Internet Gateway, and policy management systems.
- Participated in planning and deploying VNG offices worldwide.
- Conducted lab/testing of advanced network systems to serve an enterprise with over 4,000 people.
- Ensured efficient performance and real-time data visualization.
- Reducing the time it takes to resolve work by 40%, previously taking 3 hours to change a system, now takes about 2 hours and 15 minutes to change a similar system.

FPT TELECOM | JUN 2024 - MAY 2026

Software Engineer

Technical Skills: Retool, ReactJS, JavaScript, Raspberry Pi, NextJS, Shell, Python, C

- Building the Orange Pi project to automate testing CPE with Python for Orange Pi 5B+, JavaScript for the mini Backend, and Bug-SCSS- JavaScript for the Frontend. All are deployed on Docker.
- Learning Embedded Linux with STM32, and RTOS with AK-mOS
- Building the Template Web Monitor for more than 4 million CPEs (Customer Premises Equipment) base on Retool. Build custom components used in Retool using ReactJS.
- Develop Portal for TR-369 to monitor and control Devices

SMALL PROJECT

- I placed second in the departmental competition on self-driving autos that use obstacle avoidance and line-following sensors.
- Face recognition coded with Python on Raspberry Pi 4
- Arduino PID Single Axis with drone motor and MPU6050 GY-521, and code C++, for learning PID and Tuning PID
- Mini Game Dungeon on AK Embedded Kit with MCU is STM32L151, NOR Flash W25Q80 and LCD SSD1306
